reHi,

klopp76 wrote on Fri, 25 September 2009 09:24Hi,

sorry, but I dont understand you.

I downloaded a template.

In the directory "/vz/template/cache/" are

centos-5-i386-minimal.tar.gz

centos-5-x86_64.tar.gz

But when I create a vz I get this message.

Creating container private area (centos-5-minimal)

Cached os template /vz/template/cache/centos-5-minimal.tar.gz not found

Creation of container private area failed

I dont find a template called centos-5-minimal.tar.gz

```
$ vzctl create <CTID> --ostemplate centos-5-i386-minimal [...]
```

Hope this is clear enough

Bye,

Thorsten
