---

I am completely stumped as I cannot figure out what is wrong with this container. Has anyone seen this error before, if so, what steps do you take in order to fix it?

```
[root@openvz7 ~]# vzctl start 1810
```

```
Starting container ...
```

```
vzquota : (error) quota file is corrupted
```

```
vzquota on failed [4]
```

Any ideas?
