Subject: How do I access a serial usb device from a VE?
Posted by JimL on Thu, 15 Oct 2009 18:43:18 GMT

I have an embedded processor (Arduino) I want to be able to access from a piece of software that talks with it over a USB connection. I can't seem to figure out how to expose the USB port to a VE.

It's not a disk so bind mount doesn't seem to be the solution.

Thanks,
Jim.
