Subject: Debian Lenny 686 virtualizing Can I use CentOS 5 64? (In the background)
Posted by Augustino on Sat, 17 Oct 2009 01:38:30 GMT

Hi

I have installed Debian Lenny 686, I want run CentOS 5 64, I will run it, perfectly?

Also some could say me how can I run this virtual machine in the background?

Best Regards
