Subject: *SOLVED* vzctl create extremly slow
Posted by disaster on Thu, 15 Jun 2006 14:08:37 GMT

Hello!

If i start vzctl create it is extremely slow because tar and gzip for decompressing the image do not use the cpu power. They mostly uses only about 0.03%-10% CPU...

tar.gz Image: 140MB
Decompressing with vzctl takes about: 4minutes

Stefan
