Are there newer kernels available? I mean from the wiki I see this:

Quote:
uname -a

Expected output:

2.6.24-8-pve #1 SMP PREEMPT Fri Oct 16 11:17:55 CEST 2009 x86_64 GNU/Linux

which is even more ancient then the 2.6.27 kernels that are available here.

Here is the link:
