Hie,

I have CT: 150: failed to start with err=-12 on my server and ENOMEM (Cannot allocate memory) in strace

VT 101 to 149 works without trouble but 150 fail to start, so i have currently 49 virtuals running

I think i have enough memory and i can't find where is the problem.

Can somebody help me

Server : Ubuntu TLS 8.04 on power Edge 620

```
# free

The configuration ws created whith vzsplit -n 150, attached below

In attachment the trace log

#strace -fv vzctl start 150

Please can't someone tail me what a miss

Thanks
