Hi,

you can test the latest devel OpenVZ branches on

<http://download.openvz.org/kernel/branches/2.6.24/current/>

or

<http://download.openvz.org/kernel/branches/2.6.26/current/>

or

<http://download.openvz.org/kernel/branches/2.6.27/current/>

... seems that the linux kernels above, have enabled kvm support, but check the kernel configs.

Bye,
Thorsten
