Subject: Re: Any news on a new kernel branch?
Posted by pva0xd on Fri, 06 Nov 2009 13:16:20 GMT

I've tried to point upstream's attention to this topic but still got no answer and I do not see any answer here. This uncertain situation forced us to move on lxc and they work quite nice in case you don't need checkpointing or some specific networking inside containers. Just use recent kernels, enjoy real upstream solution and remember that openvz guys did a great work on this front either

As far as security concerned, in Gentoo we merge patches from stable 2.6.27 branch into openvz sources so known serious bugs are fixed in Gentoo openvz patchset. The last vulnerability found will be addressed as soon as Greg uploads new stable (2.6.27.39) release.
