Subject: There is great concern that OpenVZ is no longer being supported.
Posted by JimL on Sun, 08 Nov 2009 19:34:31 GMT

See the discussion on the General/discussions forum page.

We have asked over there about the status of newer kernels but no one from the development team has responded. A number of us are about to jump ship and start deploying different solutions for implementing virtual systems thinking that OpenVZ may be dead or dying. I don't want to but it looks like OpenVZ is no longer being maintained. What say the developers?

Jim.
