
Subject: init.d scripts not executed

Hi *,

to get an Oracle virtual server I have installed a Suse Linux Enterprise Server 11.1 in a KVM, installed an Oracle 11.2 Server in it and tested it. When it worked just fine I then did a "physical to virtual" migration".

The result is a container which runs just fine too IF I run the needed startup scripts (network/xinetd,sshd,oracle) in /etc/init.d by hand.

Runlevel is 3

Kernel version is 2.6.24-pve

Basi OS is Debian (Proxmox)

Any ideas/hints why those scripts are not executed automatically?

Joachim
