Hi \*,

in a Suse-6.3 Container the KSH doesn't work correctly :

```
dhsrv08:~ # ksh
```

```
ksh: j_init: tcgetpgrp() failed: Inappropriate ioctl for device
```

```
ksh: warning: won't have full job control
```

```
\h:\w #
```

```
\h:\w # dhsrv08:/usr/fib1 # tty
```

```
/dev/pts/0
```

Host OS is Debian (Proxmox), Kernel 2.6.24-7-pve.

Joachim
