Hi,

like this minimal script /etc/ha.d/resource.d/vz script

```
#!/bin/bash
```

```
_VZCTL="/usr/sbin/vzctl"
```

```
_VZLIST="/usr/sbin/vzlist"
```

```
_VZLIST_OPTS="-Hostatus"
```

```
case "$2" in
```

```
  start)
```

```
    $_VZCTL $2 $1
```

```
    ;;
```

```
  stop)
```

```
    $_VZCTL $2 $1
```

```
    ;;
```

```
  status)
```

```
$_VZLIST $_VZLIST_OPTS $1
```

```
    ;;
```

```
  *)
```

```
    echo "Usage: vz [CTID] {start|stop|status}"
```

```
    exit 1
```

```
    ;;
```

```
esac
```

```
exit 0
```

Hope this helps.

Bye,

Thorsten
