This directory is not mounted of course.. (-_-)

vzctl start 102

...

+ umount /var/lib/vz/root/102/home

umount: /var/lib/vz/root/102/home: not mounted

+ umount /var/lib/vz/root/102/backups

umount: /var/lib/vz/root/102/backups: not mounted

Error executing umount script /etc/vz/conf/vps.umount

...
