Subject: dlm in openvz kernel
Posted by webofunni on Thu, 10 Dec 2009 07:32:34 GMT

Hi,

AS mentioned here

 http://www.gossamer-threads.com/lists/linuxha/pacemaker/5790 7

The dlm for managing the cluster file system like ocfs2 is available only at > 2.6.26 kernels.

My question is :

Is DLM to manage the cluster file system at user space is available in openvz kernel ?

If that is no. Then is there any problem in using the openvz patch with latest kernel. Is there any future problems that may arise ?
