Hi,

sorry for delay.

I would recommend you to start with the following pages

<http://wiki.openvz.org/Category:Networking>

[http://wiki.openvz.org/VEs\\_in\\_different\\_subnets#.283.29\\_Putting\\_VEs\\_to\\_different\\_subnetworks](http://wiki.openvz.org/VEs_in_different_subnets#.283.29_Putting_VEs_to_different_subnetworks)

You'd better learn some basic concepts at first.

It's not clear what network configuration you want to set up.

It would be great if you are able to describe what you want to achieve.
