Subject: *SOLVED* disable venet0
Posted by dbeery on Wed, 21 Jun 2006 15:55:38 GMT

Is there a way to disable or remove venet0 from the hardware node AND VPS? We are doing strictly veth devices and bridging but our network configs in the VPS are getting overwritten at each startup so that we have to manually redo them.

I'm speaking specifically of the /etc/sysconfig/network, /etc/sysconfig/ifcfg-venet0, and /etc/sysconfig/route-venet0 files that getting created.

Is this all there is to it?

  http://forum.openvz.org/index.php?t=tree&th=270&mid= 1516&&rev=&reveal=

Thanks,
Derrick
