Hi Everyone!

I don't know if I've played with my system to much or if this disappeared during an update....

Anyhow I'm missing the vzyum command

```
# vzyum
-bash: vzyum: command not found
```

```
# uname -r
2.6.18-164.2.1.el5.028stab066.10
```

```
# cat /etc/redhat-release
CentOS release 5.4 (Final)
```

```
# rpm -q vzyum
vzyum-2.4.0-11
```

```
# vzlist
CTID    NPROC STATUS   IP_ADDR      HOSTNAME
 101      2 running  192.168.2.171  openvz
 102      2 running  -           vz102
```

```
# rpm -ql vzyum | grep bin
/usr/share/vzyum/bin/yum
```

```
# /usr/share/vzyum/bin/yum -c /vz/template/centos/5/i386/config/yum.conf
--installroot=/vz/root/101 --vps=101 list
```

Traceback (most recent call last):

File "/usr/share/vzyum/bin/yum", line 28, in ?

yummain.main(sys.argv[1:])

File "/usr/share/vzyum/yum-cli/yummain.py", line 92, in main
 result, resultmsgs = do()

File "/usr/share/vzyum/yum-cli/cli.py", line 459, in doCommands

 self.initActionTs()

File "/usr/share/vzyum/lib/yum/depsolve.py", line 56, in initActionTs
 self.ts.setVPS(self.conf.vps)

File "/usr/share/vzyum/lib/rpmUtils/transaction.py", line 48, in __getattr__
 return self.getMethod(attr)

File "/usr/share/vzyum/lib/rpmUtils/transaction.py", line 58, in getMethod
 return getattr(self.ts, method)

AttributeError: 'rpm.ts' object has no attribute 'setVPS'

Any hints what happened with my vzyum command?

Thanks in advance & Happy new year!

Michael
