Subject: VM can not be started
Posted by fazaha on Tue, 29 Dec 2009 16:00:23 GMT

Hello,
one of my VMs on my OpenVZ node can not be started
when i start it, it says :
bash: line 417: echo: write error: Disk quota exceeded
 ERROR: Can't write to file /etc/sysconfig/network-scripts/ifcfg-venet0

 and
 ERROR: Can't copy file /etc/hosts
/bin/cp: writing `/etc/hosts.22183': Disk quota exceeded

how can it be solved?
