Hey, thanks for the reply.

Could you please tell me how i can find out how much is swap, and how much is RAM? i already have this script to print out the memory usage, but i do not not the actual contribution of Swap, and RAM.

```
-----  
beans=`cat /proc/user_beancounters | grep priv`  
max=`echo $beans | awk '{ print $4;}'`  
use=`echo $beans | awk '{ print $2;}'`  
let "per=$use*100/$max"  
let "mb=$use/256"  
echo "privvmpages usage: $mb MB ($per%)"  
-----
```

Does the memory usage as displayed by the above program include both RAM AND Swap?

Thanks a lot
