Hello!

I think I found the problem, its maybe a bug ...

I made my own template named my_template.tar.gz so when I create a CT using my template, the
OSTEMPLATE variable is : OSTEMPLATE="my_template" and is there when doesn't works.

Then rename my template by my-template.tar.gz and and that seems to work well.

I think the problem is with the _ charter in to the OSTEMPLATE variable.

Thanks.
