Hi,

I have following config

```
internet
|
router
| Public subnet
fw - dmz
|
LAN
```

I have a server with OpenVZ that has to host Containers with IP from both public and DMZ subnet

I tried to set IPs on 2 NICs each connected in pub and dmz respectively, but I cannot ping from pub to dmz.

Default route is public

Do i miss something?

If more information is needed I'll provide it.
