Please help me someone.

Will this do the trick :

```
iptables -t nat -A PREROUTING -p tcp -d 88.88.88.88 --dport 8888 -i eth0 -j DNAT --to-destination 192.168.0.1:8888
```

Whats the internal IP of the server is it 192.168.0.1 OR 10.0.0.0

Please help someone. I have spent nearly a week trying to figure this out.
