Hi,

i tried 2.6.26-dostoevsky.1 kernel and everything works like clockwork.
The only steps I did are the following

```
# sudo /etc/init.d/nfslock restart
audit_log_user_command(): Connection refused
Stopping NFS statd:                [ OK ]
Starting NFS statd:                 [ OK ]
# sudo /etc/init.d/nfsrestart
sudo: /etc/init.d/nfsrestart: command not found
# sudo /etc/init.d/nfs restart
audit_log_user_command(): Connection refused
Shutting down NFS mountd:          [FAILED]
Shutting down NFS daemon:          [FAILED]
Shutting down NFS services:        [FAILED]
Starting NFS services:              [ OK ]
Starting NFS quotas:                [ OK ]
Starting NFS daemon:                [ OK ]
Starting NFS mountd:                [ OK ]
