## Subject: Re: HN Dropping Packets
Posted by HaroldB on Fri, 23 Jun 2006 19:16:50 GMT

I was using some rules from http://wiki.openvz.org/Traffic_shaping_with_tc

I believe this may have caused the problem. I have removed them to verify. However, the limit (mbit/sec) for each IP which I enforced was not reached when the packets are being dropped. Are there any limitations to this which we should be aware of?
