Subject: Kernel update and downtime?
Posted by jantman on Wed, 31 Mar 2010 13:14:56 GMT

Hello,

I'm in the process of evaluating OpenVZ vs Xen. I must say that I'm leaning towards Xen at this point, but I want to give OpenVZ a fair chance.

One thing I'm a bit unclear on... I know that (obviously) the CTs run the same kernel as CT0. Can I migrate a CT to a node with a different kernel?

How are kernel upgrades done on OpenVZ (without downtime)?

Thanks,
Jason
