hi guys....

i have installed openz and hypervm correctly without any error..

but when I enter https://<ip-address>:8887 in browser i only see a page with the "slave server" message.

what is the problem???

i should mention,i have installed openvz at first and made VPS and could connect to my VPS via command-line correctly,and after that installed hypervm as a control panel.

i will be very appreciate if someone help me
