Subject: Re: It seems RedHat 6 is based on 2.6.34, How will that affect 2.6.32 support in OpenVZ?

RHEL6 is 2.6.32 based. Where have you got different info?

We do care about supporting newer distros on a RHEL5 kernel, by backporting newer syscalls and stuff like that. So yes, you can run ubuntu-10.4 container on openvz rhel5 kernel.
