Hi,

- iptables on HN is off
- ping from another HN didn't work
- ping from HN to VE (hosted on this HN) ok
- tcpdump from VE - no transmission
- tcpdump from HN on bridge - ok
- tcpdump from HN on physical interface - ok

It look's like no transmission between HN (venet) and VE

I checked /proc/sys/net/*
and compare with documentation.
After that I set echo 1 /proc/sys/net/ipv4/ip_forward

and all works fine
