Dear Members

I am getting the following message whenever I am restarting the container.

Adding IP address(es): 2xx.xxx.xxx.190

bash: line 291: 3794 Segmentation fault grep -qE '191.255.255.[0-1]' \$file

bash: line 409: 3795 Segmentation fault grep -q "\${FAKEGATEWAYNET}/24 dev

 \${VENET_DEV}" \${ROUTE} 2> /dev/null

bash: line 61: 3796 Segmentation fault grep -E "^\$name=.*" \$file > /dev/null 2>&1

bash: line 61: 3797 Segmentation fault grep -E "^\$name=.*" \$file > /dev/null 2>&1

bash: line 393: 3798 Segmentation fault grep -q 'if \["\${DEVICE}" = "lo" \]; then' \${file} 2>
/dev/null

bash: line 495: 3811 Done echo "\${IFNUMLIST}"

 3813 Segmentation fault | grep -q -E "^\${IFNUM}\$" 2> /dev/null

Setting CPU units: 1000

Configure meminfo: 1165536

Set hostname: mail.xxxxxsolutions.net

bash: line 61: 3832 Segmentation fault grep -E "^\$name=.*" \$file > /dev/null 2>&1

File resolv.conf was modified

Container start in progress...

I did check in the forum but did not find any solution addressing this problem(may be I missed too.. dont know).

Any help resolving this would be appreciated.

Thanks in advance.
