Subject: Re: X-Window in VPS (FC5) Posted by dev on Mon, 26 Jun 2006 16:38:59 GMT View Forum Message <> Reply to Message

since you have empty \$DISPLAY X tries to access hardware directly. It was ssh -X who had to set DISPLAY variable to correct value.

Check that you have

X11Forwarding yes

enabled in /etc/ssh/sshd_config inside your VPS.
