---

Hi all,

Both HN and CT got public ip in same subnet.

The host got ip:

118.x.x.67

And the VE got ip:

118.x.x.68

And I can access both ip.

The problem is when I access internet in VE(118.x.x.68) I got the HN's Ip(118.x.x.67) not It's public ip(118.x.x.68)

The HN's ip route

```
HW:~# ip route list table all
192.168.210.8 dev venet0 scope link
192.168.210.9 dev venet0 scope link
