Hi,

I think that you should pay attention at the last message:
Quote:
Missing config file ifcfg-ifcfg-venet0.

I have similar file on my system and it belongs to vzctl-3.0.24-1.

rpm -qf /etc/sysconfig/network-scripts/ifcfg-venet0
vzctl-3.0.24-1

Why is it called as "ifcfg-ifcfg-venet0" on your system?
