Greetings,

It seems that my server has been cracked. The cracker modified several openvz template i downloaded from precreated images:
- debian-5.0-x86.tar.gz
- centos-5-x86.tar.gz

Since these images are not available anymore in http://ftp.openvz.org/template/precreated/, i can not re-download, and i don't know where to find md5sum of these images.

I download these images around February 2010.

If anyone use any of these images, please let me know the md5sum of the archive.

Thank you very much in advance.

Gandy
