Subject: Re: VEID 101 exist mounted down
Posted by enemo on Mon, 09 Aug 2010 18:52:35 GMT

Hi all!
sorry for delay, I was traveled to the server, it is far.

I examined the server and found additional problems, in particular, a memory errors and kernel oopses, which was not at the time of writing the top post. After memory replacement all VE's starting and running fine.
My mistake was that I had not tried to reboot the server before posting - but it was impossible at the moment.

So I'm sure that root cause is hardware fault.

Thank you!
