CentOS Release 5.5
2.6.18-164.15.1.el5.028stab068.9

So, your kernel is not 2.6.18-164.15.1.el5.028stab068.9 because
you wrote that a bunch of patches were applied.

Then I just recommend you to get the whole list of patches or reproduce the issue on plain
OpenVZ kernel.
