These instructions have solved me the same problem in different situations and different host/container versions:
sudo vzctl start 101
sudo vzctl exec 101 "cd /dev; /sbin/MAKEDEV pty"
sudo vzctl exec 101 "cd /dev; /sbin/MAKEDEV tty"
sudo vzctl exec 101 "update-rc.d -f udev remove"
sudo vzctl stop 101
sudo vzctl start 101
