These instructions have solved me the same problem in different situations and different host/container versions:

```
sudo vzctl start 101
```

```
sudo vzctl exec 101 "cd /dev; /sbin/MAKEDEV pty"
```

```
sudo vzctl exec 101 "cd /dev; /sbin/MAKEDEV tty"
```

```
sudo vzctl exec 101 "update-rc.d -f udev remove"
```

```
sudo vzctl stop 101
```

```
sudo vzctl start 101
```
