Hello,

some processes on my node use a lot of CPU. How do I find out which VE runs which process?
In top or with ps aux I only see this:

```
28910 33      15  0 35948 8608 3288 S 89.5  0.1  0:21.07 /usr/bin/php5-cgi
```

So the process root is /usr/bin/php5-cgi, but I still don't know which VE executes it. The load of all VEs is normal, so I also can't find it with veid,laverage.
