---

Today Redhat released a kernel that fixes the recent local root exploit:

<http://tech.slashdot.org/story/10/08/18/1534258/Linux-Xorg-Critical-Security-Flaw-Silently-Patched>

<https://rhn.redhat.com/errata/RHSA-2010-0661.html>

Will openvz soon be releasing an updated kernel that fixes the issue?
