i still get errors :/

got one with that step.

```
fakeroot make-kpkg --initrd --append-to-version=-ovz32 --revision=1.0 kernel_image
kernel_headers
```

also here

```
root@St0rm:/usr/src# mkinitramfs -k linux-headers-2.6.32-5-common-openssl -o
/boot/initrd.img-2.6.32-5-common-openssl
Cannot find /lib/modules/linux-headers-2.6.32-5-common-openssl
root@St0rm:/usr/src# mkinitramfs -k linux-2.6.32-5-common-openssl -o
/boot/initrd.img-2.6.32-5-common-openssl
Cannot find /lib/modules/linux-2.6.32-5-common-openssl
root@St0rm:/usr/src# mkinitramfs -k linux-2.6.32-openssl -o
/boot/initrd.img-2.6.32-5-common-openssl
Cannot find /lib/modules/linux-2.6.32-openssl
root@St0rm:/usr/src#
```

mate i will add u in ICQ.. hope u don't mind  
mine is 47474..

Thank u
