Hi,

vzpkg is obsolete, so some modification are not up to date,
since 2009-01-27 sample config file 'vps.basic' was renamed 'basic'

ve-vps.basic.conf-sample -> ve-basic.conf-sample

two possible solution:

1) vzpkg should be fixed, but obsolete!

file cache-os

<http://git.openvz.org/?p=vzpkg>

;a=blob;f=cache-os;h=997ef633a3ffdbe30522bab68fa67b9617d2fdc
c;hb=22a86a55d6bd4580cceff02998746dce8f4d011a

line: 104

fill a bug report against vzpkg at bugzilla.openvz.org

2) create sym link to act. config-file

% ln -s /etc/vz/conf/ve-basic.conf-sample /etc/vz/conf/ve-vps.basic.conf-sample

Bye,
Thorsten
