Quote:So your template is too big. What you need to do is increase CT disk quota for templates being created, usually it means increasing DISKSPACE values in /etc/vz/ve-basic.conf-sample file.

it's work like charm thanks Kir i really appreciated it and i didn't know there is different between forums and paid customer support and why they act like that in forums if they know the solution and didn't answer it , cpanel , vbulletin and u guys help , but i don't know what's wrong with them

anyway thanks again
