Hello !

I have problem with interfaces insite VE

I cant use iptarf iftop and any other traffic monitor

```
lo    Link encap:Local Loopback
      inet addr:127.0.0.1  Mask:255.0.0.0
      inet6 addr: ::1/128 Scope:Host
      UP LOOPBACK RUNNING  MTU:16436  Metric:1
      RX packets:1498 errors:0 dropped:0 overruns:0 frame:0
      TX packets:1498 errors:0 dropped:0 overruns:0 carrier:0
      collisions:0 txqueuelen:0
      RX bytes:226905 (221.5 KiB)  TX bytes:226905 (221.5 KiB)

venet0  Link encap:UNSPEC  HWaddr 00-00-00-00-00-00-00-00-00-00-00-00-00-00-00-00
      inet addr:127.0.0.1  P-t-P:127.0.0.1  Bcast:0.0.0.0  Mask:255.255.255.255
      UP BROADCAST POINTOPOINT RUNNING NOARP  MTU:1500  Metric:1
      RX packets:6200 errors:0 dropped:0 overruns:0 frame:0
      TX packets:5735 errors:0 dropped:0 overruns:0 carrier:0
      collisions:0 txqueuelen:0
      RX bytes:706345 (689.7 KiB)  TX bytes:1843323 (1.7 MiB)

venet0:0  Link encap:UNSPEC  HWaddr 00-00-00-00-00-00-00-00-00-00-00-00-00-00-00-00
      inet addr:IP  P-t-P:IP  Bcast:IP  Mask:255.255.255.255
      UP BROADCAST POINTOPOINT RUNNING NOARP  MTU:1500  Metric:1
```

I do iftop -i venet0:0 or iptraf -i venet0:0 but there is nothing to show

Also

```
root@iconawigator /# nmap --min-rate=1000 -n -p 1-1024 localhost
```

Starting Nmap 5.21 () at 2010-12-01 12:09 CET

Nmap scan report for localhost (127.0.0.1)

Host is up.

All 1024 scanned ports on localhost (127.0.0.1) are filtered

Nmap done: 1 IP address (1 host up) scanned in 4.08 seconds

```
root@iconawigator /#
```

there is any firewall

Chain INPUT (policy ACCEPT)

target prot opt source destination

Chain FORWARD (policy ACCEPT)

target prot opt source destination

Chain OUTPUT (policy ACCEPT)

target prot opt source destination

The network is working fine I can ping any host and access the IP from outside

kernel

Linux iconawigator.com 2.6.18-194.17.1.el5.028stab070.7 #1 SMP Fri Oct 1 14:17:14 MSD 2010
i686 i686 i386 GNU/Linux

Regards,
Piotr
