
Subject: PPTP in Container - Kernel 2.6.32

Hello *,

with the search option for "pptp" I found a pointer to wiki article
"http://wiki.openvz.org/PPP_in_container".
In there a kernel version 2.6.27 is said to be required.

On my "production system" I run kernel version 2.6.32 ... is there a chance/way to get PPTP
running in a Debian-5 container on that kernel version?

Thanx,

Joachim
