I've built a Debian package from the current vzquota package (3.0.12) available on http://download.openvz.org/utils/vzquota/current/src/

When I try to install it, I get the same error reported and answered here: http://www.mail-archive.com/users@openvz.org/msg02497.html

But the suggested patch:
http://git.openvz.org/?p=vzquota;a=commitdiff_plain;h=fe25e9430428c03ba491f1a31f5b23bc5dc352f6
doesn't seem to be yet included on a released version.
