Subject: bindmount /home with noexec,nosuid,nodev
Posted by ccto on Wed, 26 Jan 2011 15:15:13 GMT

Hello All,

For added security, I would like to make the /home as noexec,nosuid,nodev and keep the 2nd level quota running as usual.

Can I use the following bindmount to do so? Do any one know any bad impact?

mount --bind -o rw,noexec,nosuid,nodev /vz/private/101/home /vz/root/101/home

I found a similar post at
    download.swsoft.com/virtuozzo/virtuozzo4.0/docs/en/lin/VzLin uxUG/18548.htm

Thank you very much for your advice.
Regards
George
