OK was able to resolve this, turns out my VPS was not defined to have enough resources, this has been resolved.

Now; however, Oracle is install and I am running the dbca command. During the execution of this command the following occurs:

/bin/cat: /proc/swaps: No such file or directory

ACK: Altstack failed errno 12 astart 0x4ad08000 size 0xa000

Java HotSpot(TM) Client VM warning: cannot allocate alternate signal stack

Java HotSpot(TM) Client VM warning: Attempt to allocate stack guard pages failed.

Anyone know how I might get by this?

Thanks!
