I am having issues migrating containers to a Proxmox host. The guys at Proxmox haven't been much help. Here is the link to what we were discussing over there:

<http://forum.proxmox.com/threads/5200-Server-migration>

Basically I'm trying to migrate containers from OpenVZ to Proxmox. The Proxmox server is returning that it has run out of disk space. There is over 1 TB free and I'm trying to move over a couple gigs.

Any ideas?
