Subject: Re: vzdev will be removed by udev?!
Posted by thyson121 on Wed, 23 Feb 2011 09:56:15 GMT

I had a similar problem sometime ago and had sought professional help. They told me that I needed to uninstall udev. I did that and it solved the issue. I am pretty sure udev is the chief culprit in this case also. I am of the view that drups will have to get rid of udev in order to solve the issue.
